

## Service Note

### Fescue Fertilization

Technician Name: \_\_\_\_\_

Today, \_\_\_\_\_, we performed the following services:

\_\_\_\_\_ Fertilization to maintain healthy growth, strengthen the root system and help your fescue lawn maintain healthy growth.

\_\_\_\_\_ Weed Control for existing broadleaf weeds.

\_\_\_\_\_ Plant Health Fungicide to enhance the root and leaf growth of your fescue lawn and to improve establishment of new seedlings.

**Please note:** Light to moderate leaf coverage is **NOT** a problem and does not reduce the effectiveness of today's service. Wait until after rainfall or watering to rake or move and bag the leaves. Mulching leaves (*not side discharge*) with a lawnmower may be done at any time and **does not require watering**.

#### What To Do Next

- Water **15-30 min** each area if rainfall is not forecast within the next few days. Watering moves the fertilizer into the soil.
- Mow as needed. If it hasn't rained and if bagging, **BE SURE** you water before you mow! Don't want to water? Then please **MULCH** leaves and clippings.
- Fescue lawns need about one inch of rainfall or equivalent watering, per week, even during the winter.
- **NEVER mow fescue lawns short – ALWAYS mow at 3" or taller.**

#### Client Portal

View your account and make payments online. Just visit our website and click "My Account." You will need your Client ID to create an account, found on your invoice or by calling our office for assistance.

#### Missed Appointments

A \$35 trip charge may be added to your application if we are unable to access your yard and complete the application. Ensure that your gate is unlocked and your pets are put away.
