

## Service Note

### Spring Weed Control

Technician Name: \_\_\_\_\_

Today, \_\_\_\_\_, I applied the **Spring Weed Control & Pre-Emergent Application** to your lawn.

This treatment:

- Prevents crabgrass and other spring/summer weeds from germinating.
- Controls winter weeds that may be present in your lawn. Control may take 21 days or longer although changes may be visible in as little as 5 to 7 days.

### What To Do Next

- Keep pets and people off of sprayed areas until dry.
- Do not rake or do any winter clean-up until after the next rainfall.
- Mowing newly treated lawns or lawns with significant weed growth in 7-14 days will improve weed control and appearance.
- Mulching leaves and clippings is acceptable at any time, even if no rainfall has happened.
- Scalping should be done in late winter.

### Client Portal

View your account and make payments online. Just visit our website and click "My Account." To create an account, you will need your Client ID (found on your invoice) or call our office for assistance.

### Missed Appointments

A \$35 trip charge may be added to your application if we established a date/time for service and are unable to access your yard and complete the application. Ensure that your gate is unlocked and your pets are put away.
